

Brand asset book, version 1.0. Route A, the break-out O. September 2026.

THE IDEA

The sun steps out of the O

64-unit grid · ring c(30,34) r19 w10, open 90° · sun c(49,15) r9 on the 45° axis · ink box 6–58 (lagoon)

OUTLYY is about going out. The O of the name opens and the sun steps outside it. It evolves the original concept, where the sun was a dot over the L, into one shape that works both as a letter and as a symbol.

The same shape does four jobs: it's the O in the wordmark, the favicon and app icon, the ring around an agent's photo, and the loader. That's why it had to survive at 16px, and why it has its own hinted master for small sizes.

What it isn't: a location pin, a globe, a plane, a palm or a sunrise over a horizon. The only thing it tells you is that you're going out.

Wordmark

The wordmark 'CUTLYY' is displayed in a bold, dark blue sans-serif font on a white background. The letter 'C' is stylized with a small orange circle above it, resembling a rising sun.The wordmark 'CUTLYY' is displayed in a bold, white sans-serif font on a dark blue background. The letter 'C' is stylized with a small orange circle above it, resembling a rising sun.

Primary is for headers, footers, emails and vouchers on Sand or Paper. **White** is for Ink sections and photo overlays. **On-sun** is for Sun-filled surfaces only.

“UTLYY” is set in Bricolage Grotesque 800 at optical size 36 with –3.5% tracking, and converted to outlines. The ring matches the cap height plus overshoot, and the sun rises above the cap line.

Keep clear space equal to the sun’s diameter. The minimum width is 88px or 22mm. Use the **mono** versions for one-colour production only.

Scale, favicon, app icons

True-size test

* The 16-unit hinted master has a 2.8 ring and a 2.4 sun. Raster favicons sit on a Sand tile so they stay visible on dark tab strips. `icon.svg` switches the ring to white in dark mode.

Colourways

App and home-screen icons

apple-touch 180

PWA 192 / 512

512 maskable (circle mask)

The maskable icon keeps its ink inside the 40% safe circle. Every icon uses the Sand ground (`#FFF8F0`), which matches `themeColor` and the manifest.

Five colours, one sun

				
Ink #14101F Mark, letters, line work, sticker borders and shadows	Sun #FF6A13 The sun, used once per asset. It's also the WhatsApp and social ground	Sand #FFF8F0 The default ground for every asset and the email body	Paper #FFFFFF Tiles, tickets, cards and the sun on a Sun ground	Lagoon #00A6A0 · 700 #036A68 Trust only: the Verified seal and confirmations

Tints allowed

These existing tokens from `globals.css` may be used: sun-100 #FFE6D1, lagoon-100 #C9F2EE, ink-600 #574A71, ink-400 #A79EB8, ink-300 #CDC6D8 and shell #FDF3E7. Dune and Sunset stay product-only, for ratings and deals, and never appear in brand assets.

Rules

1. One sun per asset, always Sun orange, except on a Sun ground where it's white.
2. Lagoon means trust, never decoration.
3. No gradients, glow, 3D or drop blur. Shadows are hard 2–4px Ink offsets only.

Sticker, ticket, stamp, fanned tiles

Sticker

Tilt between -8° and $+8^\circ$, with a 1.5–3px 1nk border and a hard offset shadow. It only repeats claims the site already makes. Adapted from designali-in *Sticker* and the existing `sticker` utility.

Ticket stub

Notches with a dashed perforation, used for OG templates and vouchers. Adapted from *Admit One Ticket* and *Ticket Confirmation Card*.

Stamp

A serrated 56-tooth edge with type set on the curve, used for the Verified Supplier seal. Adapted from designali-in *Stamp*.

Fanned tiles

Three tiles at -8° , 0 and $+8^\circ$, with the sun only on the centre tile. Adapted from serafimcloud *Empty State*.

Icons are drawn on a 24-grid with 2px Ink strokes and round caps and joins. The background is transparent and made to sit on Sand, with an Ink floor shadow at 6%. Render at 320×200 with `alt=""`, since the heading next to it carries the meaning.

OG images and avatars

WhatsApp and social avatars

The same Sun-ground avatar goes on WhatsApp (+971 58 825 6515), Instagram, X and LinkedIn, so customers recognise it in every chat list. The mark sits at 50% of the canvas, safe inside any circle crop. The Ink version is an alternative only.

Template fields in **[brackets]** are slots for real data. Each rim colour identifies a page type: **Sun** for an activity, **Ink** for a category and **Sand** for a collection.

Email, voucher, trust, people, states

Email header

Display at 208×48 using the @2× PNG. It's baked on Sand to survive dark mode.

Voucher and invoice

Put the lettermark in the PDF corner and the lockup in the voucher header. The print-black version is for monochrome printers.

Verified Supplier

Asset only and not placed yet. Use the seal on supplier pages and the chip on cards.

Agent avatar frame

Sizes 96, 48 and 32. The sun is the online dot and turns Ink-400 when the agent is away.

Loader

The arc draws on, then the sun pops, on a 1.4s loop. Under reduced motion it becomes a static mark with an opacity pulse. (Shown here as a still frame.)

404

The sun has gone out. It replaces the Scene gradient on the recovery page.

How it moves, and what not to do

Motion

Sun out: on logo hover or focus the sun nudges up and out, using `--ease-spring` over 280ms.

Draw on: arcs draw in with `--ease-out-soft`.

Sticker drop: chips land with the existing `pop-in`.

Never: spinning suns, bounce loops or parallax. Reduced motion always shows a static state.

Tone

Keep it playful, never childish. It should be exciting without being loud, and premium without looking like a luxury brand. When unsure, take the decoration away and leave the sun.
